MATERIAL INTRODUCTION

TARPAULIN COVERING MATERIAL-DOUBLE SIDED SYNTHETIC PVC

COATING

- ◇ Waterproof
- ◇ Weather resistance and UV protection
- ◇ Fire resistance
- ◇ Anti wrinkle
- ◇ Anti low temperature
- ◇ Mildew proof
- ◇ Resistance to decomposition
- ◇ Light transmittance

BASE CLOTH & COATING

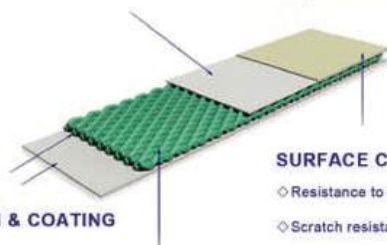

- ◇ Cohesiveness
- ◇ Avulsion resistance
- ◇ Light transmittance

BASE CLOTH

- ◇ Stretch length
- ◇ Elongation
- ◇ Space stability
- ◇ Inflammability

SURFACE COATING

- ◇ Resistance to dirt and self-cleaning
- ◇ Scratch resistance
- ◇ Anti sticking
- ◇ Welding ability
- ◇ Weather resistance and UV protection
- ◇ Light surface/reflectivity

It has long-lasting adhesion performance: the knife scraping coating technology uses the physical-chemical bonding of liquid PVC and fiber to directly scrape the slurry onto the fabric;

Firm welding performance: the fabric after welding can bear a lot of tension, even in the harsh environment such as hurricane, frequent operation, it will not affect the sealing degree of welding;

Durable service life: a certain thickness not only gives the coated fabric good UV resistance, but also extends the service life of the product;

Good color fastness: due to the pigment directly immersed in the PVC coating, the knife scraping coated fabric can keep its color always bright as new, and its anti-corrosion, anti mildew, anti ultraviolet and flame-retardant (M2 and B1) properties meet international standards. If properly stored, it will not rot and mildew within 3-5 years;

Spherical awning with unique design concept, novel structure, safety and other unique charm. The structure of high strength seamless steel pipe is stable and solid, which is the choice of high-end users. The foundation of the shelter project is solid, and the materials and structures used are of high safety. The building structure has reached the strict European standards. The overall structure has passed the wind test and damage test of professional institutions.

MAIN STRUCTURE OF AWNING-GALVANIZED STEEL

High purity Galvanized steel is used in the frame of the tent house. Steel parts are used for the support connection between columns. The roof is reinforced with steel cable diagonal Roof, wall base maintenance material is galvanized steel. The materials are qualified according to the national non ferrous metal quality supervision and inspection center
